Hapity Installation Guides: WordPress

Here's how to install the Hapity WordPress plugin in your WordPress website.

Firstly, go to Hapity.com and login. Once logged in, go to your Profile page and you'll then see your Plugin ID, which you'll need later.

Next, go to your WordPress website, add /wp-admin to the end of the URL, and login as an Admin.

On the WordPress dashboard, click on the Plugins menu and select Add New. Search for the Hapity Plugin and when you locate it, click Install Now. An FTP dialogue box will appear where you need to enter your FTP hostname, username and password.

Once your Hapity Plugin has been installed, click Activate. Once activated, click the Settings menu and select WP Hapity.

Next, go back to your Hapity Profile page and copy your Plugin ID, then go back to the WordPress dashboard and paste your Plugin ID into the authentication field in the Hapity WordPress Plugin and click authenticate.

Your Hapity Plugin is now enabled and ready to use.
